ECOLOGICAL SERVICES

Urban Edge Environmental Consulting has considerable experience in carrying out a wide variety of ecological surveys and impact assessments. These include:

- Walkover, Phase 1 and extended Phase 1 habitat surveys
- BS42020 compliant Preliminary Ecological Appraisal
- Phase 2 surveys and protected species surveys (including badger, bats, birds, dormouse, great crested newt, otter, reptiles and water vole)
- Ecological Impact Assessment
- Habitats Regulations Assessment
- Ecological design and template reports for CSH and BREEAM assessments
- Mapping of habitats and ecological features
- Mitigation and enhancement strategies, licence applications and implementation
- Environmental management plans and Ecological Clerk of Works

We place great emphasis on good quality field data as the means of determining an accurate baseline from which to predict the impacts of development proposals.

We produce mitigation strategies built around proportionate, effective techniques.

We produce high quality technical reports proven time and again to meet local planning authority requirements.

Let us help ensure your projects have a smooth ride through the planning process.

LET'S TALK

If you're planning a development proposal, or compiling evidence for a local development plan, and require high quality advice on the ecological implications of your proposals, don't hesitate to contact us.

We're happy to provide free consultations by phone, and even happier to attend your offices to discuss your proposals in greater detail.
